COAT RACKS

Specifications

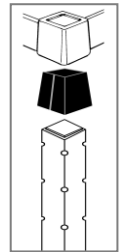

AMCO II WIRE SHELVES

Shelves have #8 (.162") gauge crosswires spaced 1-1/16" on centers with cross-braces 5/16" (.3125") minimum of 6" on center and running perpendicular to crosswires. Cross braces welded at each end inside 5/8" leg of channel 9/16" x 1-1/4" x .090" thick with legs of channel pointed to center of shelf. A square tapered 1-3/4" high steel collar is welded at each corner. Additionally, a suitable number of .262" rebrace wires are welded to the underside of 18", 21" and 24" wide shelves in lengths of 54" and longer. All contact points are welded.

AMCO II POSTS

All rigid form construction. Posts are .065" thick 1" O.D. square tubes notched every 2" on each corner of the post. A nylon cap is installed on the top of the post. Installed on the bottom of each stationary post is a nylon housing for a steel leveler 3/8" – 16 x 1 1/4". The leveler has a 7/8" hex head and a 3/4" threadless shoulder to eliminate deposits of mop strands or broom fibers.

METHOD OF ASSEMBLY

Four nylon tapered collets are packed with each shelf. The collet may be installed onto any notched position on the post. Posts are installed into the tapered shelf collars which mate with the tapered nylon collet to securely seat the shelf onto the post without the need for special tools.

Coat Rod Sets

AMCO's Coat Rod Set converts any shelving unit into storage for garments on clothes hangers. Set includes rod and two hangers to install below a wire shelf.

Plating Plus™ Model No.	Length		Wt.	
	(In.)	(mm.)	(Lbs.)	(Kg.)
CR24	22	559	3	1.4
